Sales Performance Analysis and Reporting

Business Analysis

Power BI

July 2026

ABOUT THE CLIENT

The Client is a leading pharmaceutical distributor committed to providing essential medications across the healthcare sector. They want to use the sales and customer data to improve **demand forecasting, inventory management, customer engagement, and business performance**, enabling smarter decisions and sustainable growth

Scope, objectives, and analytical approach

The Client engaged the analytics function to evaluate global sales performance, identifying where revenue and profit are concentrated, which products and customers carry the business, and where demographic or geographic gaps limit growth.

This review consolidates two Power BI analyses — Sales Overview and Customer Analysis — into a single executive narrative, with findings translated into concrete recommendations.

Dashboard Analysis

The Client demonstrates strong reported profitability, with $46.17M profit and an 82.03% margin.

Revenue and profit move together, indicating that stronger sales months also translate into stronger earnings.

Unstable Performance levels across the year, with recurring peaks and troughs that warrant demand and inventory investigation.

A relatively small group of customers and drugs contributes a meaningful share of revenue, creating both concentration risk and relationship-management opportunities.

Dashboard Analysis

$56.29M
Total Revenue

$10.11M
Total Cost

213K
Quantity Sold

$46.17M
Profit

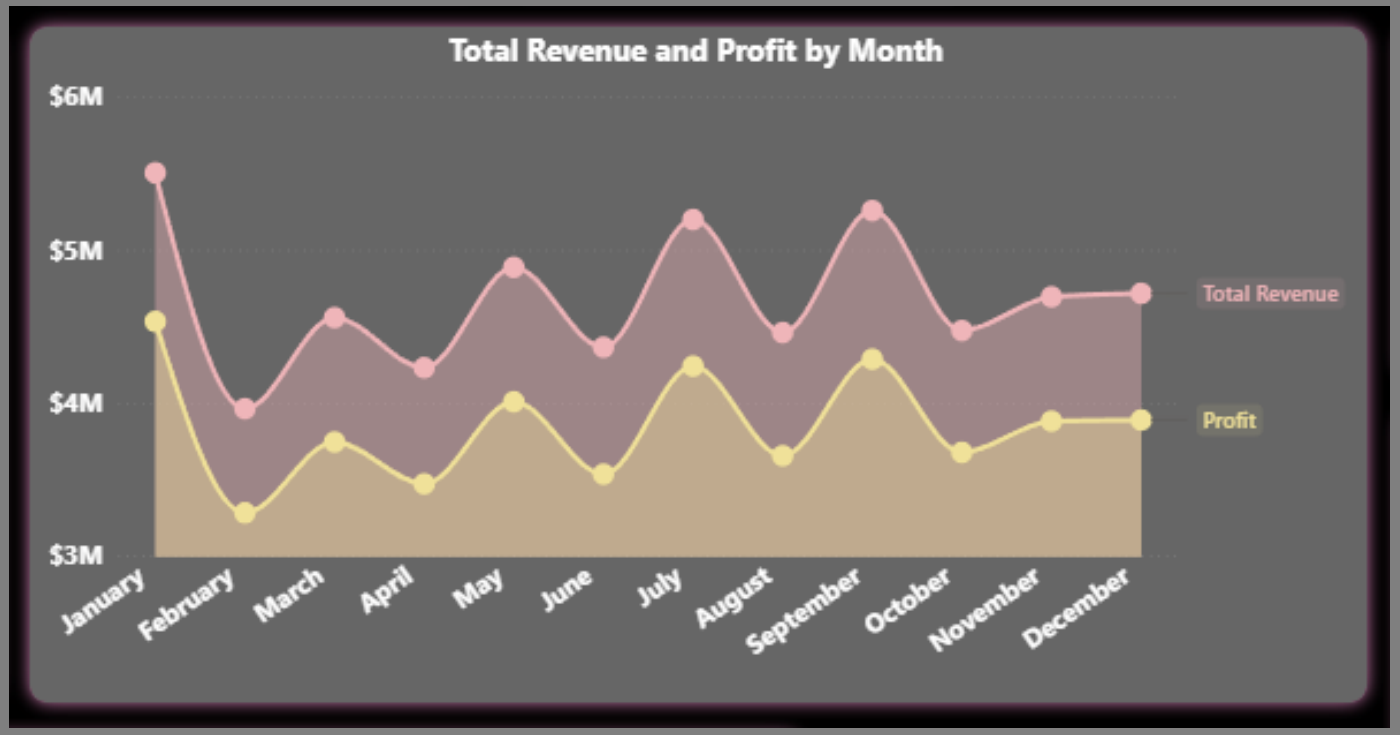

82.03%
Profit Margin

Revenue of $56.29M establishes a strong sales base.

Reported cost of $10.11M is low relative to revenue, producing $46.17M profit.

213K units sold indicates meaningful transaction volume and a substantial operating footprint.

An 82.03% profit margin is exceptionally strong.

Revenue peaks around January, July, And September, with profit following the same broad pattern.

February, April, June, August, and October show noticeable pullbacks.

The synchronized movement of revenue and profit suggests that volume/revenue is the dominant driver of monthly profit performance.

The repeated peaks and troughs may reflect customer ordering cycles, seasonality, promotions, or inventory replenishment patterns.

Ergocalciferol is the leading drug in the displayed Top 5 ranking. Doxycycline, Lisinopril, Ezetimibe, and Clonazepam also contribute strongly to revenue and profit.

The Top 5 collectively generate approximately $13.30M revenue and $11.72M profit.

The displayed average margin for the group is approximately 88.14%, indicating strong product economics.

Top 5 Drugs by Total Revenue, Profit, and Sales Volume, with Percentage Contributions

DrugName	Total Revenue	Profit	Total Quantity sold	Profit Margin
Ergocalciferol	$2,967,581.41	$2,729,241.47	6077	91.97%
Doxycycline	$2,774,772.30	$2,638,922.32	5609	95.10%
Lisinopril	$2,717,459.78	$2,450,977.58	8708	90.19%
Ezetimibe	$2,455,062.86	$1,991,625.00	5311	81.12%
Clonazepam	$2,381,038.47	$1,907,677.44	5157	80.12%
Total	$13,295,914.82	$11,718,443.81	30862	88.14%

Prednisone, Metformin, Warfarin, Amoxicillin, and Montelukast appear among the lowest-ranked products by revenue.

The group still records approximately $1.87M revenue and 28,492 units sold, so these are not necessarily insignificant products.

The displayed combined margin is approximately 43.01%, materially below the Top 5 group.

Bottom 5 Drugs by Total Revenue, Profit, and Sales Volume, with Percentage Contributions

DrugName	Total Revenue	Profit	Total Quantity sold	Profit Margin
Prednisone	$433,404.27	$337,419.27	6399	77.85%
Metformin	$487,633.50	$266,233.50	5535	54.60%
Warfarin	$194,611.68	$61,835.68	4742	31.77%

Top 5 products earn 7x the bottom 5

Top 5 Customers by Total Revenue and Sales

CustomerName	Total Revenue	Total Quantity sold
Alice Smith	$2,517,212.54	9020
Bob Smith	$2,583,410.29	10412
Bob Williams	$2,791,400.72	10564
David Johnson	$3,201,777.03	11878
Jane Brown	$2,588,623.29	10096
Total	**$13,682,423.87**	**51970**

Bottom 5 Customers by Total Revenue and Sales

CustomerName	Total Revenue	Total Quantity sold
Alice Brown	$1,282,727.48	5190
Alice Jones	$1,285,434.41	4861
Carol Jones	$734,864.49	2693
Carol Smith	$225,032.82	905
Jane Smith	$417,659.98	1388
Total	**$3,945,719.18**	**15037**

The Top 5 customers generate approximately $13.68M in revenue and 51,970 units sold.

They represent roughly 24% of total company revenue, indicating meaningful customer concentration.

The Bottom 5 customers generate approximately $3.95M revenue and 15,037 units sold.

Low current revenue does not necessarily mean low strategic value.

The top 5 customers generate 3.5x the revenue of the bottom 5 on comparable order volumes

Count of Gender by Customer Type and Age Group

Average Revenue by Customer Type

Customer Type: Preferred Customer, New Customer, Frequent Buyer

Dashboard Analysis

Customer revenue is not evenly distributed across demographic groups.

Male customers aged 65+ and 55–64 generate the highest revenue per demographic segment, while 35–44 is the strongest female cohort

Canada and Australia together account for 72% of total revenue.

Preferred Customers show the highest displayed average revenue at approximately $4.85K.
New Customers follow at approximately $4.56K, while Frequent Buyers are approximately $4.09K

Preferred Customers spend just 19% more on average than **New Customers** showing a narrow gap in loyalty. **Frequent Buyers** rank last in average value despite highest purchase frequency, suggesting they are buying often but in smaller Quantities.

RECOMMENDATIONS

01	**Optimize inventory management**	Prioritize high-demand and high-profit drugs.
02	**Strengthen customer retention**	Develop loyalty programs and personalized engagement for high-value customers.
03	**Review low-performing products**	Identify opportunities for better pricing, cost reduction, or portfolio optimization.
04	**Expand high-performing markets**	such as Canada and Australia while also identifying growth opportunities in weaker markets.
05	**Make data-driven decision-making going forward**	By continuously monitoring sales trends, customer behavior, profitability, and market opportunities.

SUMMARY

The Client Solutions generated $56.29M in revenue and $46.17M in profit, demonstrating strong overall financial performance. We identified key-performing drugs, customers, and markets that contribute significantly to business growth.

Monthly sales trends revealed fluctuations that highlight the need for better demand forecasting and inventory planning.

Customer and demographic analysis provided valuable insights into purchasing behavior, customer segments, and geographic opportunities.

By optimizing inventory, strengthening customer retention, improving low-performing products, and expanding high-potential markets, The Client can achieve sustainable growth and greater operational efficiency.

THANK YOU
